• Image is for reference only and might not be 100% reflective of the actual product.

This type of enclosures is distinguished due to its excellent capability of noise reduction. This is mainly due to the presence of attenuators on each of the air inlet and outlet sides. It is fully weather proofed and the exhaust muffler is mounted inside. The noise reduction ranges between 60 and 73 dBa.

Canopy Structure

- 3 mm steel canopy body & 2mm steel for doors and louvers.
- 10 cm high-density Rockwool for Sound Insulation.
- 3 layers high corrosion-resistive coating.
- Stainless-Steel locks and heavy duty GI steel hinges.
- Exhaust silencing system in the interior of the enclosure.

Service & Maintenance

- Large access doors for easy maintenance
- Rear attenuator allows easy radiator service.
- Radiator-fill access through a special plastic cap on the top of the enclosure.
- Lube oil pipe outlet to allow appropriate drainage.

Security & Safety

- Fuel fill and battery are secured through lockable doors.
- Emergency stop push button mounted on the exterior of the enclosure (optional).

Loading & Shipment

- Lifting Points on the base or on the top of the enclosure.
- 2 Removable attenuator for shipping space optimization.

Notes:

- Due to continuous improvements, data is subject to change without prior notice.
